M. L. Book

Page 242

The page contains several hand-drawn lines. A long, curved line starts from the left edge and extends towards the bottom center. Another line forms a loop in the upper right quadrant, resembling a stylized '3' or a scribble. There are also some smaller, less distinct marks scattered across the page.

M. L. Book

The figure consists of two side-by-side line graphs. Both graphs have 'Rate of reaction' on the y-axis and 'Temperature (°C)' on the x-axis. The x-axis for both graphs ranges from 0 to 40 with major ticks every 10 units. The left graph shows a curve that starts at a low rate at 0°C, rises to a peak at 30°C, and then falls at 40°C. The right graph shows a curve that starts at a low rate at 0°C and rises steeply, leveling off at 30°C and remaining at that high rate at 40°C.
